- Provide full lifecycle support to clients from initial client interaction and requirements analysis through design, coding, testing, debugging, implementation and integration.
- Provided and implemented idea which helped client application to work faster.
- Extensive proficiency in impact analysis, work estimation, designing development & mentoring the team.
- Good Knowledge on React JS, NODE JS, Single SPA Framework, IONIC
- Extensive Knowledge on RXJS operators and NGRX

## Education Qualification

- B. Tech (CSE) from JNTUK University in 2018 – 66%
- Intermediate Vikas Junior college – 85%
- SSC – LPMZPH School – 8.0CGPA

## Professional Experience

- Currently working as Senior Software Engineer at **Techmojo Solutions Private Limited** since **2022 Mar 4 to till date**.
- Previously working as Software Engineer at **Bluerose Technologies Private Limited** since **Mar 2021 Aug 26 to 2022 Feb 27 Client ACCENTURE – C2H**
- Previously working as Software Engineer at **Utthunga technologies Private Limited** since **Mar 8, 2021 to 2021 Aug 25 (6months) – Contract**
- Previously working as Software Developer at **IGLULABS Software Private Limited** since **Oct 19, 2020 to 2021 Feb 19**
- Previously working as Software Engineer at **Envytee Info Solutions Private Limited** since **Aug 2, 2018 to 2020 Oct 16**.

## Technical Skills

- |              |   |                                     |
|--------------|---|-------------------------------------|
| • Languages  | : | Java Script                         |
| • Frameworks | : | Angular5,7,10,13 AngularJS, Express |
| • DB         | : | MySQL, Mongo DB                     |
| • Testing    | : | Jasmin, Karma, Jest                 |
| • Tools      | : | GitHub, Bit Bucket, Postman, VsCode |

## Project Profile

### Project #6

2022 March – present

#### Title: Casino Games

**Description:** Casino games, we are having multiple brands and each and every project has separate code base and we are implementing functionalities in all brands.

**Environment:** Worked on Angular 7, Angular Material HTML5, Jenkins, Git, Angular Universal SCSS, Bootstrap, jQuery etc.

#### Roles & Responsibilities:

- *I was included in E2E development of the project which includes requirement gathering, Designing, Coding activities and Maintenance.*
- Implemented **NGRX** store to maintain the state of the application. NGRX store was used to store results after angular injector observable retrieved the data from backend. Added logic to dispatch the action to **NGRX** store, this was done to update the store and to update components subscribed to that particular store.
- Worked with version control system GIT and bug tracking tools in an Agile Scrum environment.
- *Experimenting with latest front-end technologies as a part of implementation of the high-volume external web app that helped to improve speed of web development.*
- *Code review and refactoring.*
- *Responsible for doing unit testing & integration testing of the code.*
- *Working on performance tuning to speed up the system.*

- *Involved in solving the issues which we got from QA.*

## Project #5

2021 March – 2021 Aug

### Title: Hawes & Curtis

**Description:** Hawes & Curtis is famous for its quintessentially British menswear and womenswear ranges. With over 100 years of heritage, Hawes & Curtis has a distinguished British past and a promising international future.

**Environment:** Worked on Angular 10, HTML, SCSS, Bootstrap, jQuery etc.

### Roles & Responsibilities:

- *I was including in E2E development of the project which includes requirement gathering, Designing, Coding activities and Maintenance.*
- *Experimenting with latest front-end technologies as a part of implementation of the high-volume external web app that helped to improve speed of web development.*
- *Code review and refactoring.*
- *Responsible for doing unit testing & integration testing of the code.*
- *Working on performance tuning to speed up the system.*
- *Involved in solving the issues which we got from QA.*

## Project #4

2020 Oct – 2021 Feb

### Title: Food & Safety

#### Description:

Food & safety is creating for Landon, This is a project for auditing the restaurants and giving some certificates based on their food quality and location based on their locality ,Place and width for sitting and peace.

**Environment:** Worked on Python Django jQuery MySQL DB CSS and bootstrap 3

etc.

### Second Module : Food bud

#### Description:

Food bud is a food categorized website and here we can see based on our wish and health and

Here we can customize spice based on food and we can see which food is recommended based on our health and likes

**Environment:** Worked on Angular 9, HTML, SCSS, Bootstrap, Angular material

etc.

### Roles & Responsibilities:

- *Working On second phase of implementation and Every phase we are adding new functionality*
- *Code review and refactoring.*
- *Responsible for doing unit testing & integration testing of the code.*
- *Working on performance tuning to speed up the system.*
- *Involved in solving the issues which we got from QA.*

## Project #3

**Title:** Matrimony

**Description:**

Matrimonial sites register users, after which they are able to upload their profile onto a searchable database maintained by the website. Those users looking to find suitors search the database with customised searches that typically include nationality, age, gender, availability of photograph and often [religion](#), geographic location and [caste](#).

**Environment:** Worked on Angular 10, HTML5, SCSS, Bootstrap, Angular material  
etc.

**Roles & Responsibilities:**

- *I was including in E2E development of the project which includes requirement gathering, Designing, Coding activities and Maintenance.*
- *Experimenting with latest front-end technologies as a part of implementation of the high-volume external web app that helped to improve speed of web development.*
- *Code review and refactoring.*
- *Responsible for doing unit testing & integration testing of the code.*
- *Working on performance tuning to speed up the system.*
- *Involved in solving the issues which we got from QA.*

## Project #2

Sep 2019 - 2020 Oct

**Title:** User Profile Management & Device Management & Qur Store**Description:**

Managing and Visualization the users, devices & Medicines data from DB to in three different Applications.

**Environment:** Worked on MongoDB, NodeJs, Angular, HTML, SCSS, Bootstrap, Angular material  
etc.

**Roles & Responsibilities:**

- *I was including in E2E development of the project which includes requirement gathering, Designing, Coding activities and Maintenance.*
- *Experimenting with latest front-end technologies as a part of implementation of the high-volume external web app that helped to improve speed of web development.*
- *Code review and refactoring.*
- *Responsible for doing unit testing & integration testing of the code.*
- *Working on performance tuning to speed up the system.*
- *Involved in solving the issues which we got from QA.*

**Project #1**

**Aug 2018 - Sep-2019**

**Title : Action Planner (TMS)**

**Description:**

Action Planner is a business management tool that involves Planning Objectives, Tracking Initiatives, Reporting Actions of individuals collaborate and share report for the accomplishment of collective goals.

**Environment:**Worked on Core PHP, AngularJS, MYSQL , Angular 2, HTML, SCSS, Bootstrap, Java Script etc.

**Roles & Responsibilities:**

- *Role is a Junior Developer*
- *Worked on New future's and Bug fixes and Optimization*
- *Responsible for doing unit testing of the code.*
- *Code review and refactoring.*
- *Involved in solving the issues which we got from*
